The new “normal” world (post COVID-19 pandemic)

Bringing trustable information about the bond between humans and pets, with a wide scientific base and in language accessible to all audiences.

One bark, one meow, one purr can REALLY change the world!
Basic Cattish/English Course - Lesson one: MEOWthanks!

ErasmoDEOLIVEIRA Speaker’s expertise is internationally recognized and brings concepts acquired through living with dogs and cats for generations of his family.

The patriarch, Nardino Francisco de Oliveira, was honored with his name on a square in the city of São Paulo (Brazil) and his sister, Anna Lou Olivier, was a lecturer at Harvard University, presenting part of the Behavioral Medicine research carried out in partnership with ErasmoDEOLIVEIRA.

Being him the only survivor of the family, he claimed for himself the responsibility of spreading the knowledge acquired, so that the legacy of the Oliveira’s family is not lost.
Who is interested in the mass adoption of millions of street animals around the world? If you are a Veterinarian, Dog Walker, Pet Sitter, groomer or work in the manufacture, transport, storage or trade of any product or service for animals, this means EMPLOYMENT AND INCOME for you and your family, all of this multiplied by millions.

So, even though, at first glance, you have absolutely nothing to do with abandoned animals, think of them as a great public HERITAGE - yours too - forgotten on the streets and ready to bless homes with their presence, in addition to the wonderful side effect which is the creation of MILLIONS OF JOBS, throughout the production chain.

Zika? Ebola? AIDS? What is the main epidemic in the world today?

The likelihood that ordinary people will acquire one of these famous diseases is relatively low compared to the silent epidemic that affects practically ALL people in our modern society. From a small nervous tic, to severe cases that require drastic treatments, mental illnesses should deserve due attention, since small gestures, such as spending all day connected to a smartphone, are already signs that something is wrong.
Unlike a fracture or hemorrhage, those who suffer from depression, stress or another mental illness, may ignore that they need help and even the people around them may think it is less serious, as they have no apparent symptoms and may be masked through palliative care. It happens that our consumer society fell ill en masse, each individual developed his own pathology and little is enough to explode the fury in a crowd.

Any spark is enough to start a big fire in a society that has isolated itself and forgotten the most ancient values. It seems incredible, but the real cure for all modern ills is found in the simplest attitudes and the oldest methods that Humanity has known. Downloading one more application, only aggravates problems and creates new needs. In the search for freedom, we are increasingly enslaved!

Gatomovel is the Noah's Ark of the 21st century, for seventy years saving lives with charitable refinements and spreading knowledge. The lectures on mental health and quality of life given by ErasmodeOliveira, through the Gatomovel Project, show, in a simple and direct way, how the adoption of a pet can immediately improve the individual universe of each individual and, thus, contribute to a better, healthier, unplugged and happier society.
My greatest desire is to give lectures around the world, discussing this subject with academics, businessmen, authorities and other opinion makers. We have an urgent need to redefine the priorities of what will be the new "normal" from now on, because the foundations of the old world have collapsed, concepts must change and we, researchers and thinkers, have a duty to lead and share our knowledges.

I feel compelled to help humanity find its way, I am old and I see young people guiding a world that wanders like a flock without a shepherd, without any light. I ask you to read my articles, comment and share it with all our fellow professors, scientists and thinking minds. This will be a good start, even if it is not possible to give a talk immediately.

The point is that we have to do something, our beloved planet has been devastated by greed, hatred and fake news. We are going to start a worldwide pandemic of correct information and love for our fellowmen, to join forces for a common future.

I was not born with a mask!

Year 2020. Humanity "evolved" frighteningly (in the broadest sense of this word); We created wings, conquered other planets, played God by manipulating DNA and the atom. Today, it is very "natural" to use a smartphone, but it seems ridiculous to hear the silence and talk to our inner self and our essence. The 21st century pandemic owes nothing to the Black Death of the Middle Ages: once again the Human Race is on its knees before a microscopic being and the greatest world leaders are hitting their foreheads on the glass, trying to get out of the maze. The big solution would be to wear a mask and avoid contact with other people?
Let’s talk about three subjects, which are the future, because they rescue our origins. Nature has the answer to all the problems that technology and money created, but failed to solve.

Animals are angels! Nature has the answer to all the problems that technology and money created, but could not solve.

In the past, in the creation of our Solar System, the Sun and its inexhaustible source of light and heat, which pass throughout billions of kilometers in space and brought life to Earth, came first. The same happens with the healing done by hand, which can be applied in person or remotely, bringing harmony to whoever is ready to receive it. If the patient does not deserve to be treated for the handmade cure, he is free to soak himself with antibiotics and radiation, paying dearly for CT scans, MRIs and other "last generation" treatments (the last of humanity before his extermination?), having your body invaded by artificial compounds. Each chooses his path.

Our definition of handmade healing is therapy that channels the energies of the Universe into the patient's body through the laying on of hands. Healing as Jesus did, for example.

Healing by plants is another powerful tool to rescue the origins of human beings, bringing them closer to Nature and a life full of health. For millennia, shamans have healed their indigenous peoples with the wisdom of plants. Just a little over a hundred years ago, someone saw the economic potential of millions of people becoming addicted and today we have a chemical-dependent humanity with chronic diseases that are lucky for a small group of smart guys. Currently, medicines are commercial products, reach sales targets like any other and the only difference between medicine and poison is the dose. Pandemics are business opportunities and the patient is just another customer.
Healing by plants offers health through, for example, simple contact between the patient's skin and a sachet of herbs or ingesting a cup of tea.

Animals are angels!

The only difference between medicine and poison is the dose. Pandemics are business opportunities and the patient is only one more mere client.

ErasmoDEOLIVEIRA

Animals existed on Earth long before the Human Being, no matter if you are a creationist and believe in Adam and Eve or if you are an evolutionist and believe that we are descendants of monkeys. The fact is that each animal is on the planet with a specific mission and some choose our homes to bless. Our pets often manifest the disease that affects their human guardians. A sick animal can be the key to healing the whole family and we simply need to ask the animal what it thinks and feels. Whoever has the humility and sensitivity to listen to his wise advice will prosper.

Speaking the language of angels is trying to learn the language of four-legged angels and talking with them in a two-way street.

Animals are angels!

Talking the angels' language seeks to learn the language of four-legged angels and talk to them in a two-way street.

ErasmoDEOLIVEIRA

This is the idea of fully comprehensive therapy, seeing the situation from different angles and focusing on the harmony of each person, inserted in each family.

erasmodeoliveira@gmail.com - 7
The domestic ecosystem, including the home, animals and even the memories that live there, are clues that lead us to a true and definitive cure. If you are ready to accept something beyond the lies of the media and the economic/advertising power of the big medicine/poison factories, look for a completely comprehensive, serious therapist, who sees this as a life mission and who understands our time on Earth as a brief and small model of what is the true perfect world that we keep in our subconscious and that is what is the reality. Escape from empty celebrities and influencers, immoral in their mercantilism.

Fame is just a matter of advertising, investing money to make more money! Do not be too impressed with the amount of followers that the therapist can have on social networks or with who is blasting in this pre (?) - apocalyptic world. The best perfumes are in the smallest bottles and wisdom is not a hamburger, it is a truffle! The option is to continue to wander blindly in a materialistic world, "curing" one disease and creating two more. After all, there are already beautiful models of masks and alcohol gel with varied aromas.
Who knows, our children and grandchildren will be born (?) Wearing masks, so all this text on Nature and healthy life will totally lose its meaning!

Animals are angels!

The best perfumes are in the smallest bottles and wisdom is not a hamburger, it is a truffle!

ErasmoDEOLIVEIRA

That is the focus I am in, what I have to say, if you are ready to see the new reality of this blue planet, after the pandemic. Change the way you go or keep asking the same usual gurus, the ones who drove this world to the edge of chaos and are now under their beds, frightened by the results of their stupid and politically correct theories, but laughing about the silly people who believed them. Yes, this is your jet plane, you are free to choose your pilot, have a good landing if you can!

ErasmoDEOLIVEIRA

Is the big solution even would wearing a mask and avoiding contact with other people?

ErasmoDEOLIVEIRA

erasmodeoliveira@gmail.com - 9
Imagine rescuing living beings who are at risk, who have suffered burns, beatings, fractures, being run over, poisoning. Distressed eyes, which will keep deep traumas for the rest of your life. Creatures separated from their mothers and brothers, who never knew their father, who were thrown on the street without any material goods, not even with the clothes of the body. They do not know their name, do not have nationality, suffer discrimination based on gender, race, size and their special needs. They are enslaved and need to sniff out drugs, face shootings, forced to guide the blind and discarded without mercy at the end of their “useful” life. Angels used to test cosmetics and medicines, sold and exploited in any way, in the name of human vanity.

Then, they arrive at our house and are welcomed with respect, affection, comfort. They receive fresh water, good quality food, medicine and a warm bed, as well as a large family, who accept them as they are.

We made it our life's mission, fulfilling God's first commandment to Adam, still in the Garden of Eden, before there was sin in the world (Genesis 2:15 and 19). The living word of the Eternal, faithful testimony of His LOVE towards us. Do you want to participate in this blessing, which is to receive ANGELS in your home? Open your door and adopt any of them who are wandering down your street. Tell people how good it is to wake up with the touch of a cold snout and be welcomed home with licks, a party and a tail wagging, happy. Show God that you are worthy of all the good that you ask for in prayer: YOUR KINGDOM COME. Ask and it will come, really, in the form of a stray animal. Keep doing good and YOU will go to the Kingdom!

erasmodeoliveira@gmail.com - 10
Animals and THE FOUR ELEMENTS

A simple matchstick, bought for a penny. An ice cube, made for free in our home freezer. The atmospheric air and the earth, which we breathe and tread at no cost. The main things where everything comes from, at a bargain price.

How much did the domain of fire represent for Humanity? The possibility of refrigerating food? We stopped being nomads thanks to these great conquests, now so trivial, that we despise them, unlike the alchemists, who credited them with the origin of everything.

These, lived a few centuries ago, and today, their "scientific" knowledge, sounds too elementary to us. What will animal abolitionists say about a hundred years from now? Everything that is done against animals in 2014, was done against human beings in 1814. The low cost of a match in the 21st century contrasts with the importance of the control of fire. Think on this! We will meet again in 2214 and, who knows, we will communicate in the language of angels, barking and meowing, the true universal language!
WHO REALLY NEEDS HELP? THE ANIMALS?

In 2004, a tsunami killed one hundred thousand people in eight Asian countries. Hours before the giant wave reached the continent, ALL animals, without exception, spontaneously sought shelter in lands far from the coast and were save...

Living with pets only brings benefits to the Human Being. They teaches us his unconditional love, his detachment from matter. The simple presence of a dog or cat in a house, helps to make this place a real home and all the reasons you can imagine for not adopting an animal, are, in reality, a sample of the person's terrible quality of life. We need to have the humility to learn from them, much more in a glance, than in dozens of self-help books!

Thousands of animals abandoned in the streets, thousands more crammed into shelters, all living in terrible conditions and cauterizing us in relation to the pain of others. Today, we ignore an abandoned cat or dog; tomorrow, we will find it normal to abandon our elderly parents in nursing homes and human babies in dumpsters. How can this situation be reversed, with the added benefit of transforming abandoned animals into job and income generators, in addition to promoting the unity of its group of employees?
Take home an angel and a great friend; BE ADOPTED today by an abandoned animal! RECEIVE IN ADVANCE THOUSANDS OF BARKS AND MEOWS OF GRATITUDE!

The correct place for pets is in the company of families, TWO ANIMALS IN EVERY HOME, receiving and returning affection and attention.

Let's rethink our society, which recycle CANS and discards LIVING BEINGS!

This is an awareness project on responsible ownership and love of animals, developed by Journalist ErasmoDEOLIVEIRA, disseminated through Internet posts like this - free of copyright - and lectures, at a symbolic cost, with personalized content, according to the target audience.

To promote a lecture at your company or school, simply provide an auditorium with voice equipment, and invite your employees and start celebrating, for the thousands of lives you can save, with a simple gesture. People and animals, living together in peace, with improving of mental health.

Thus, you will be encouraging teamwork, geared towards an activity with a profound social sense, the adoption of abandoned animals, in addition to being the only environmental action that you can take home.
WHO are you, a Psychologist, by the way?

Many times, I answered this and other similar questions, when the truth hurts in someone's ears. I am not a Veterinarian, an Engineer, or a Cooker, but, as a JOURNALIST, I am used to investigating various matters and dealing with the information obtained, in order to make it understandable to the public and to bring it to people through the media. This is my goal. A School Teacher could also do almost the same, but his professional experience, perhaps, was not enough for him to develop well in front of a television camera, a radio microphone or an audience of two thousand people. The true information is complete by itself, does not need lots of diplomas and titles, it is a question of being a reasonable human, only this, able to see the truth on all small things of the day.

Think about this situation: a person comes off the street nervous with something they witnessed. You tell him to settle down and drink a flake of water, which will do well. This simple act can be characterized as illegal exercise of the profession of Physician, since you recommended it to sit down - a kind of physical therapy, maybe? - and a certain portion of a chemical product - water, both with a curative function. Today, this is the reality. The most innocent counsels can be looked at with the eyes of the devil and you cannot even recommend that someone say the Lord's Prayer, without threatening to receive perpetual prison.
For those who are prepared to live in a fifth-dimension Planet Earth, what about ask me for a lecture? At least, if you do not want to hear me to say an upper level of information, please, stop to pay hills of money to the same gurus of ever, they are now much rich already and is preferrable to give a portion of food to a stray-pet, than to feed these kind of mental dinosaurs and their unuseful knowledges. Stop with black holes, light-years far away. Open your eyes to see and rescue the four-paws angel at your home gate.

Animals are angels! Let's rescue YOUR life now!

This is a global campaign of extreme public utility, where we say that the adoption of a stray animal can greatly improve the quality of life and mental health of those who adopt them. It makes permanent benefits in each house and becomes a silent revolution, which moves the wheel of the economy, generating employment and income, since each adopted animal ceases to be a problem on the street and begins to consume various products and services. The success of this work depends on wide dissemination in the press media and on the collaboration of each citizen, simply by welcoming one or two stray animals into their home. Thus, we change the concept that animals are four-legged beggars, this is the vanguard of animal protection of the 21st century and, briefly, we will have queues in search of an animal to be adopted.
ON THE PLANET EARTH, THERE IS ABOUT ONE STREET ANIMAL FOR EVERY THIRTEEN PEOPLE...

Why then are there stray animals? We are determined to change false concepts. We want to save LIFE ON EARTH, not just ONE animal. A profound social change, much more than it may seem.

DO YOU HAVE A PET?

If the answer is YES, it will probably be accompanied by a smile. All people who have a four-legged friend have many good stories to tell, they do have a lot of fun with their animals and live better. When you adopt a stray dog or cat, then you go to a pet shop to bathe it, at least. Each pet shop that opens in a neighborhood, creates jobs and avoids long dislocations, people can even work at home, removing one more car from the streets, reducing congestion and air pollution. Also, it is perspective of the first employment to the young people.

The presence of a stray animal in your life, teaches you to respect differences between living beings (combat bullying and racism), improves productivity at work, mental health and quality of life, reducing stress, hypertension, diabetes and teach children a bit of sexual education, as it is simple to address this issue, talking about the reproduction of mammals such as dogs and cats, whose life cycle and lactation is similar to humans. More than anything, we speak of the HOLINESS OF LIFE, because we daily beg for the help of our Creator, and only to Him do we owe the glory.
Our task of defending the rights of animals is not based on human parameters, we are the Noah's Ark of our era and we speak here of PURE CHARITY and the spiritual evolution of humans, who have much to learn from the PAWS ANGELS that God sent to every street in the world, free of charge. Look carefully, because there is one also reserved for you and, after adopting his Angel, look into his eyes and you will see the eyes of God!

Animals are angels! It changes all! ¡Animales son ángeles! ¡Esto cambia todo! Animaux sont des anges! Ça change tout! Animais são anjos! Isso muda tudo!

The CATTISH-HUMANISH Journalist and translator, Mr. ErasmoDEOLIVEIRA is the spokesperson of this campaign if you have to hear more about the matter. Our commitment is anonymous and free volunteering. If you can spread THE IDEA of this project, you will already be doing a lot. Clicking and sharing these articles for free will not crush your fingers and, if you can, ask us for an in-company lecture.

Animals are angels! Talking the angels' language seeks to learn the language of four-legged angels and talk to them in a two-way street.
If you agree with our idea of encouraging the adoption of abandoned animals, just help us to spread phrases like these:

“LET'S RETHINK OUR SOCIETY, THAT RECYCLES CANS AND DISCARDS LIVING BEINGS”

“Take home an ANGEL and a great friend; BE ADOPTED today by an abandoned animal and receive thousands of barks and meows of gratitude!”

https://petcred.wordpress.com/english/
The farewell time

We live in a time where death became part of our daily lives. A great lesson that our four-legged friends teach us is to face this passage with meekness. Regardless of religious dogmas, each departing pet remains as if sitting at a window, watching.

This is how they show themselves when we communicate with them, in a state of absolute peace, making it clear that being born, living and dying are relative concepts and that the important thing is to live each day exercising forgiveness, gratitude, detachment and unconditional love.

These are words that we have to say in a speech at your company. If your budget doesn’t allow, please reflect on these ideas, adopt an abandoned animal today and share the link below.

MEOWthanks in advance!

https://gatomovel.wordpress.com/
ANIMALS ARE ANGELS

MEOWthanks!
